WiredContact Enterprise Customers Speak Out . . .

Prestige Resorts & Destination

Tori Trobak, Director of Administration

"With the customization that WiredContact enables, we've been able to cut the time it takes our sales partners and managers to enter sales opportunities by 50%. And best of all, I can focus my time and attention on other parts of the business, knowing that our CRM system is in excellent hands in the WiredContact Data Center."

Advanced Property Management

Jay Spangenberg, President

"Because we are a virtual company, having immediate access to current information is critical. We can easily run reports on contacts, inspections, owners and vendors – anything in our database. We are able to reduce many pages of emails, notes and communications to a simple line item on a status report."

Reeve and Associates

Philip Reeve, President

"We're a former ACT! shop. WiredContact Enterprise is by far the best CRM tool we have used or seen in our 12 years of business. WCE saves us hours of time in productivity, and love that we can easily make customizations which have streamlined our business."

Covered Bridge Capital

Dean Lipson, President

"Since we've been using WiredContact Enterprise, our team can instantly find information, and we're much more productive. The flexibility of the software gives us different views for different records and enables us to track information that we previously had to manage in Excel. The experienced team at WiredContact has helped us exploit the software to our business needs."

Presidential Holidays

Steve Morin, Director

"Simply put – WiredContact Enterprise is robust, highly customizable, user-friendly, safe and accompanied by a great Support Team. The Web Lead Capture form helps us quickly respond to inquiries since the web forms are automatically added to our database."
